

NGO

**You've been chosen as our representative
on the Local Citizens Board.
Your main task is to protect the interest
of the people living in the valley.**

Lately, your organization is focusing on helping **Refugees 1** and **People with disabilities 2**. We believe that you should assist the representatives of those groups during the meeting. They might have some problems with communicating their ideas.

We should first and foremost make sure that all citizens have access to the **Preparedness package 3**. All of the families in the Valley should know how to prepare themselves for a flood! But remember that not all of the groups will feel its effect so you should first and foremost try to fund actions with **additional effects 4**!

We all are the members of the same community!

You might also want to invest in some other solutions which will raise the level of **wellbeing 5** of the most disadvantaged groups. If their wellbeing is high enough, it might trigger the development of the valley.

We also support **Reforestation 6** and **Retention polder 7**, which will raise safety in the whole Valley.

Don't disappoint us!

You can find more details about the actions on your action cards.
